Ziad Gamal

Full-Stack Developer (Laravel & MERN)

ziadgamaldev@gmail.com | ziad-gamal | **ziadgamal.com** | ZiadGamalDev | +20 1555696148

Profile+

Full-stack developer with 3 years of experience building production-grade backend systems, scalable REST APIs, and real-time platforms for ride-hailing and e-commerce apps. Strong focus on performance, clean architecture, and Laravel/PHP, Node.js, Redis-driven designs. Experienced with async jobs, Redis queues, CI/CD, WebSockets, MyFatoorah/Stripe payments, and AI-assisted workflows for faster, reliable delivery.

Skills

- **Languages:** PHP (Laravel, Livewire), Node.js (Express, NestJS), TypeScript/JavaScript, Next.js, React
- **APIs & Real-Time:** REST APIs, WebSockets (Pusher, Socket.IO, Reverb), JWT, Sanctum, Async Processing
- **Data & Caching:** MySQL, MongoDB, Redis (queues, caching, Horizon), Query Optimization, Indexing
- **DevOps & Testing:** Git/GitHub, GitHub Actions (CI/CD), Docker, PHPUnit, Jest, Deployment Pipelines
- **Architecture:** Clean Architecture, SOLID, OOP, Microservices, Async Jobs, Performance Tuning
- **AI-Assisted Development:** Antigravity, Cursor, Claude Code, Codex, GitHub Copilot — accelerated delivery, refactoring, and debugging workflows

Experience

Backend Developer (Part-time) **Dinamo (Egypt, Remote)** **Apr 2024 – Present**

- Developed backend systems for ride-hailing, e-commerce, and applications serving thousands of users.
- Built scalable Laravel APIs using Redis queues, Horizon, async jobs, and real-time WebSocket features.
- Improved performance via optimized queries, caching layers, and reduced response latency.
- Delivered dashboards, payment flows, and bilingual features across production client projects.

Backend Developer (Part-time) **DropIdea (UAE, Remote)** **Nov 2023 – Apr 2024**

- Built backend modules for Dr. Car (appointments, JWT authentication, payments, multilingual flows).
- Integrated Stripe payments and Firebase notifications for production usage.
- Improved API performance through caching, optimized queries, and structured error handling.

Projects

Taxi Arab — Real-Time Ride-Hailing net.taxiarab.user | taxi-arab-showcase

- Enhanced backend workflows with batch driver invitations and real-time tracking (**10k+ downloads**).
- Rebuilt driver assignment on Redis queues, Horizon, and async jobs with retry fallbacks.
- Implemented Pusher real-time features and an analytics-rich admin dashboard.

Le Souk — E-Commerce Platform le-souk.vercel.app

- Built complete Laravel backend: authentication, products, cart, orders, coupons, and MyFatoorah payments.
- Implemented Redis caching, multi-language support, and scalable API structure with clean architecture.
- Designed action-based backend modules ready for deployment and end-to-end testing.

Customer Support System customer-support-system

- Core API author in a 5-person ITI team: Node.js, Socket.IO, agent load-balancing, MongoDB.
- Team delivered 7 connected apps: APIs, dashboards, and JWT-authenticated web clients.

Smart Edu — EdTech smart-edu.ziadgamal.com

- Built a deterministic PyMuPDF + regex pipeline extracting 2,055 of 2,063 exam questions (99.61% extraction rate), with an AI fallback for the rest.
- Queue-driven Laravel 12 + Reverb architecture with live progress; delivered in one month, rated 5/5.

Education

Bachelor of Computer Science **Fayoum University** **Sep 2020 – July 2024**

- **Graduation Project (A+):** Shakhsni – AI-Powered Healthcare App

Certifications

- Information Technology Institute (ITI) — Open Source/MERN Track (2025)
- Coursera — Supervised Machine Learning
- Harvard CS50x

Languages

- **Arabic:** Native
- **English:** Conversational
